# PROJECT OVERVIEW

- **User Management:** Login/Signup, Add/Remove Users, Profile Viewing, and User Search.
- **One-to-One Chats & Group Conversations:** Facilitates dynamic, real-time communication.
- **Real-Time Messaging:** Powered by Socket.io for instant updates.
- **Secure Authentication:** Utilizes JWT for secure login and data protection.
- **Responsive Design:** Ensures compatibility across devices for seamless user experience.
- **Outcome:** A robust and scalable communication tool offering a user-friendly, secure, and efficient platform for interactive communication.

# EXISTING SYSTEM

- **Mobile-First Design:** Popular chat platforms like WhatsApp and Telegram are optimized for mobile devices.
- **Limited Web Functionality:** Some apps lack robust web-based features or require a mobile device for authentication and use.
- **Mobile Dependency:** WhatsApp Web, for example, relies on the mobile app for data synchronization, authentication, and connectivity.
- **Connectivity Issues:** If the mobile device loses internet access or battery power, the web version becomes unusable

# PROPOSED SYSTEM

- **Independent Web Functionality:** Access directly from any web browser without relying on mobile devices for authentication or synchronization.
- **User-Friendly Authentication:** Secure JWT-based login supports multi-device access.
- **Real-Time Communication:** Instant message delivery for one-to-one and group chats, powered by Socket.io.
- **Group Chat & Collaboration:** Efficient management of chat groups for enhanced collaboration.

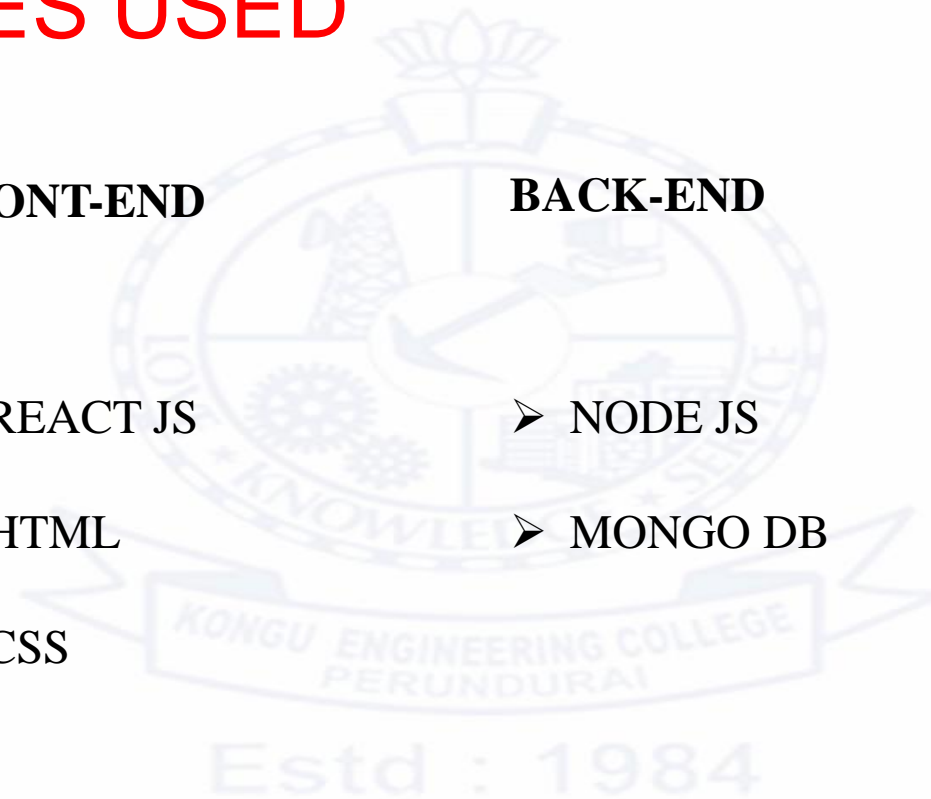

# TECHNOLOGIES USED

## FRONT-END

- REACT JS
- HTML
- CSS

## BACK-END

- NODE JS
- MONGO DB

# MODULE DESCRIPTION

## LOGIN/SIGNUP:

- **User Registration:** New users can create an account by providing email, name, password, and profile details.
- **Login Authentication:** Users log in using their email and password.
- **Credential Validation:** The system validates the entered credentials for accuracy.
- **JWT Token Generation:** Upon successful login, a JWT token is generated for secure session management.
- **Session Management:** JWT tokens keep users logged in during active sessions.

## SEARCH USER:

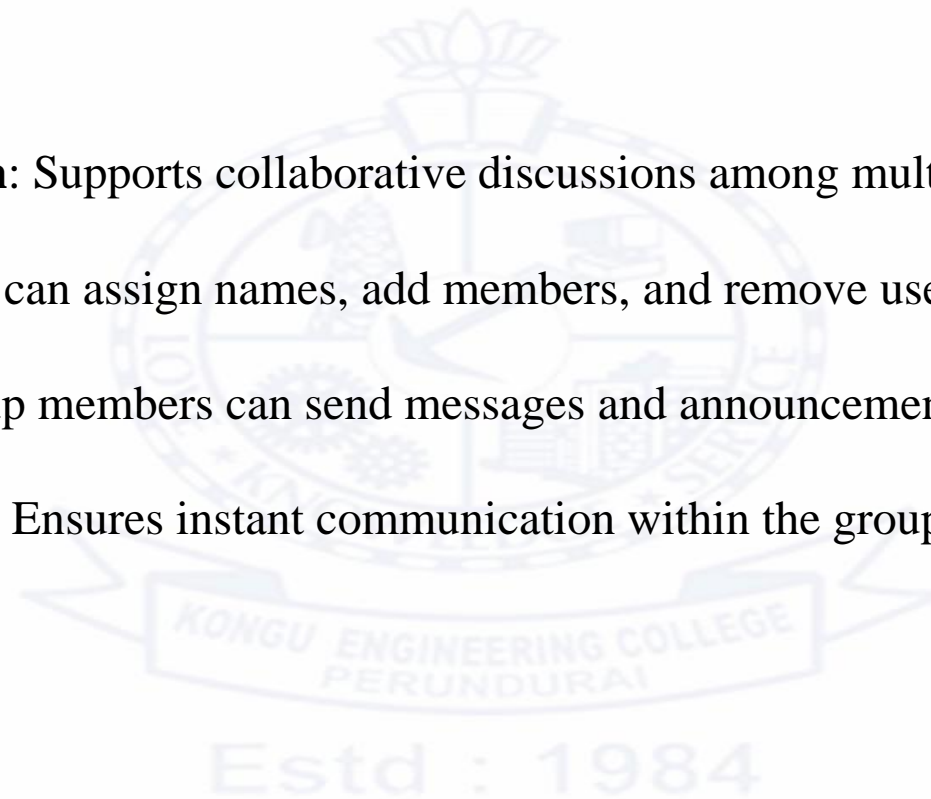

- **Advanced Search Functionality:** Allows users to search for others by **name** and **email**.
- **Efficient Querying:** Uses **MongoDB's text indexing** for fast and effective searches, even with large datasets.
- **Relevant Results:** Displays relevant user profiles in the search results.
- **Direct Chat Links:** Provides direct links to start chats with searched users.

## ONE-TO-ONE CHATS:

- **Private Messaging:** Enables real-time, private messaging between two users.
- **Conversation Initiation:** Users can start conversations with any registered user.
- **Real-Time Communication:** Powered by **Socket.io** for instant message delivery and smooth communication.
- **Message Storage:** All conversations are securely stored in the database for future reference

## GROUP CHATS:

- **Group Communication:** Supports collaborative discussions among multiple users.
- **Group Creation:** Users can assign names, add members, and remove users while creating groups.
- **Message Sharing:** Group members can send messages and announcements visible to all participants.
- **Real-Time Interaction:** Ensures instant communication within the group using **Socket.io**.

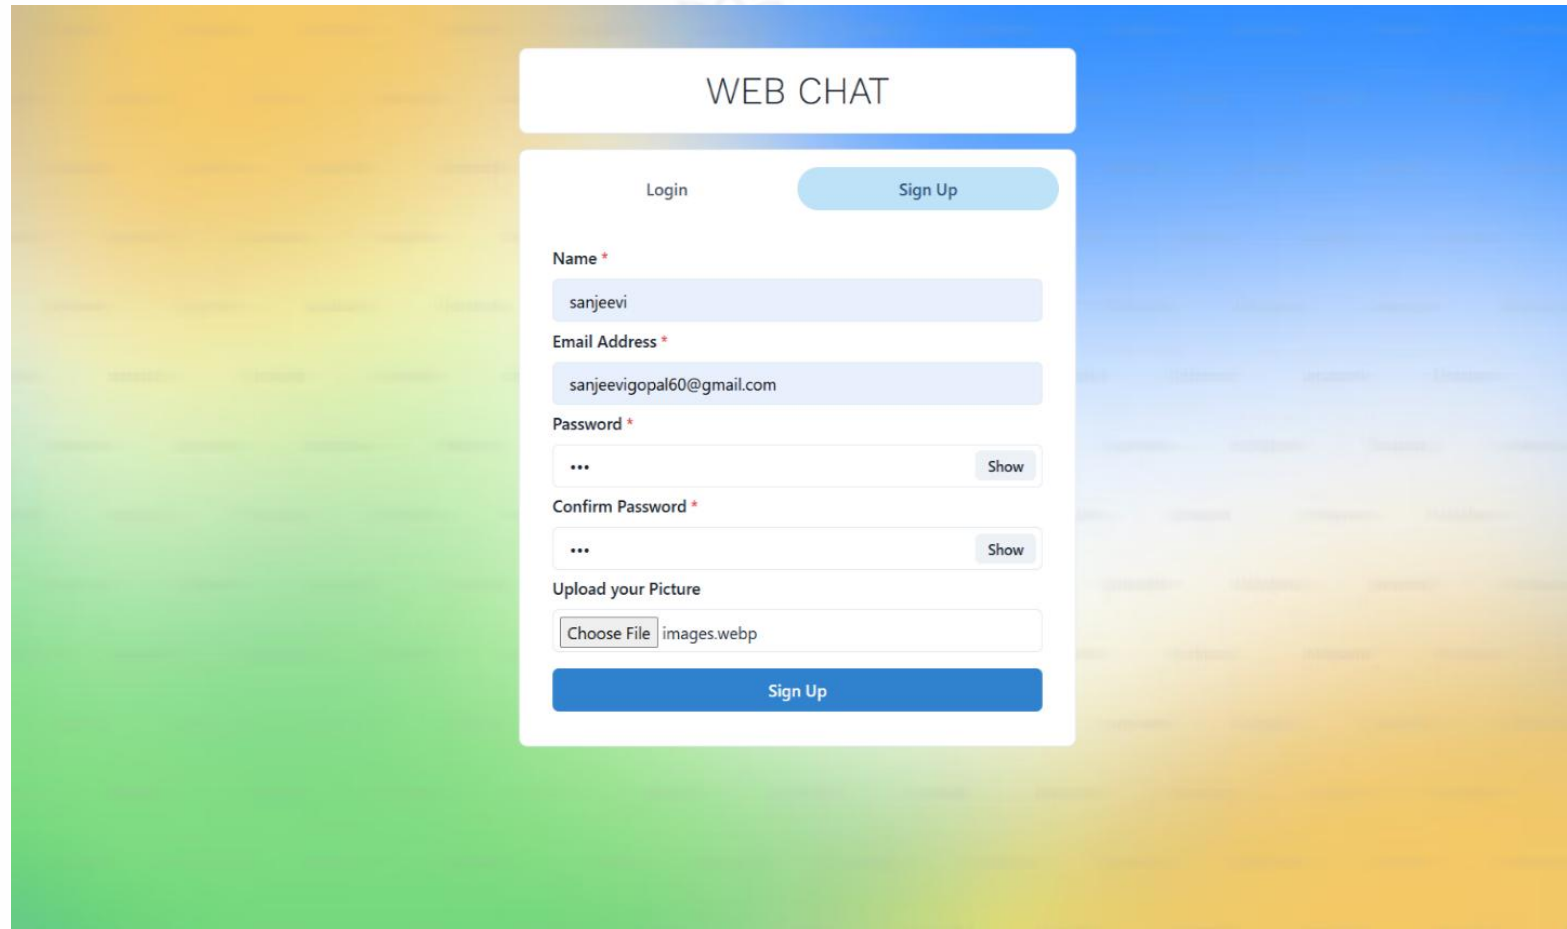

## NOTIFICATION:

- **Real-Time Alerts:** Notifies users about new messages and group updates.
- **Message Notifications:** Includes alerts for both **chat messages** and **group messages**.
- **Persistent Notifications:** Notifications are stored in the database and remain displayed until dismissed or marked as read.
- **User Engagement:** Ensures users stay informed about important events in real-time.

# SCREEN SHOTS

## SIGNUP PAGE

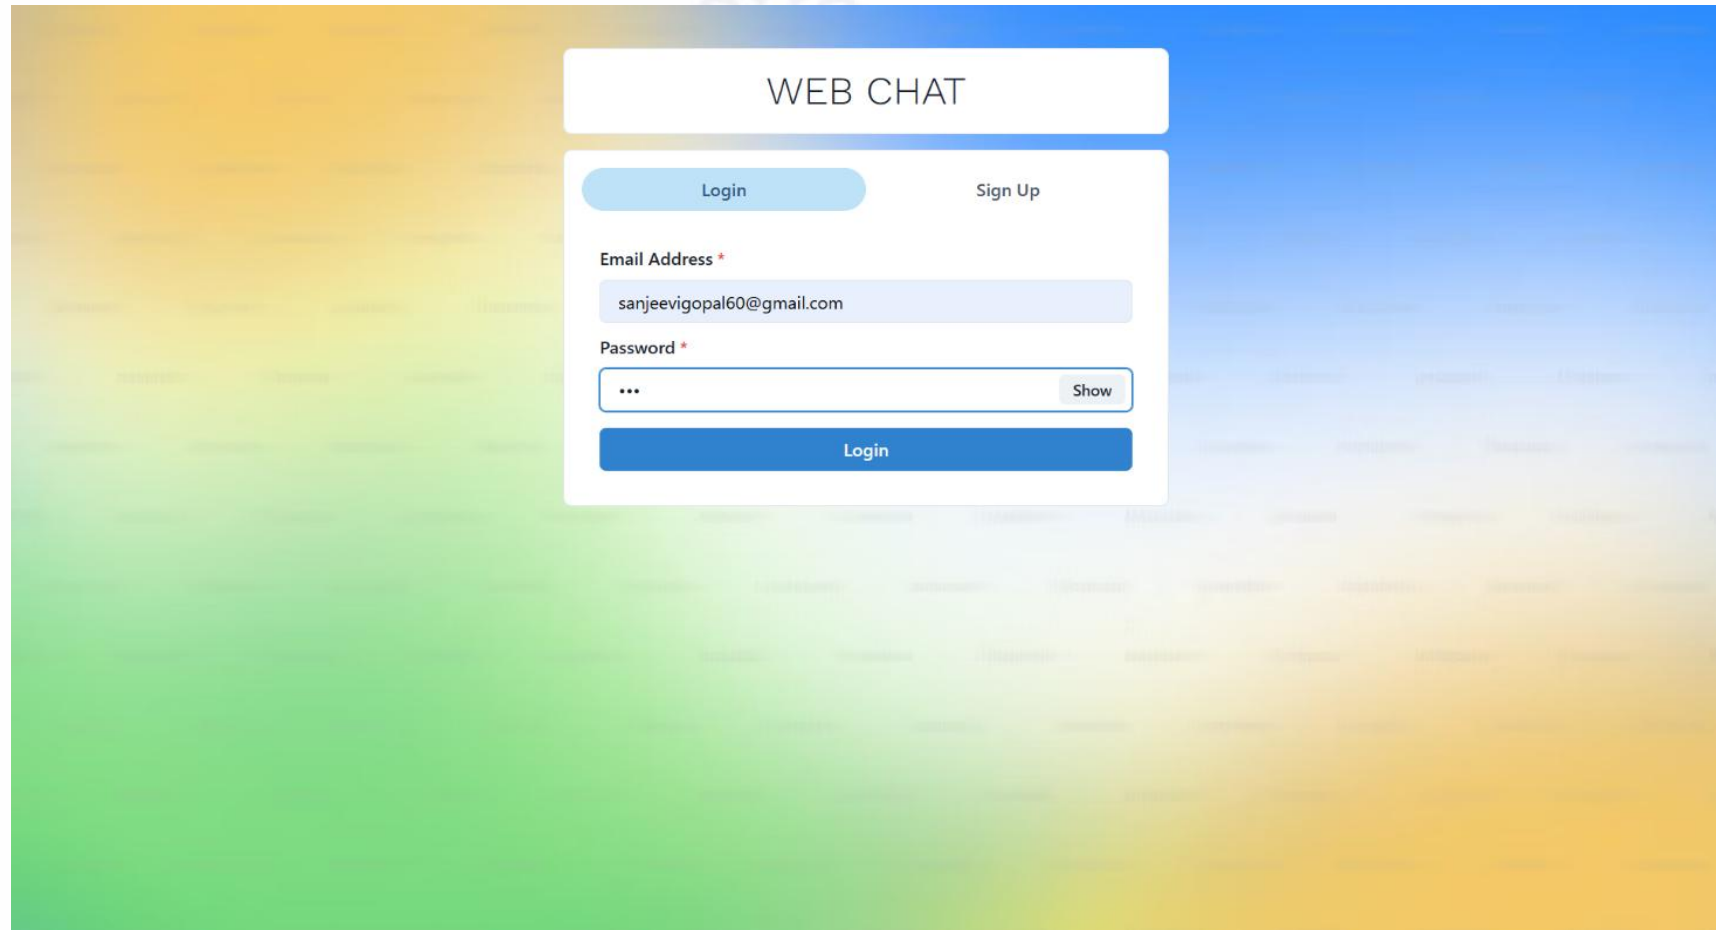

The screenshot shows a web chat interface with a 'WEB CHAT' header. Below the header, there are two tabs: 'Login' and 'Sign Up'. The 'Sign Up' tab is active. The form contains the following fields:

- Name \***: A text input field containing 'sanjeevi'.
- Email Address \***: A text input field containing 'sanjeevigopal60@gmail.com'.
- Password \***: A password input field with masked characters '\*\*\*' and a 'Show' button.
- Confirm Password \***: A password input field with masked characters '\*\*\*' and a 'Show' button.
- Upload your Picture**: A file upload section with a 'Choose File' button and the text 'images.webp'.

At the bottom of the form is a large blue 'Sign Up' button.

## LOGIN PAGE

A screenshot of a web chat login page. The page has a blue header with the text "WEB CHAT" in white. Below the header, there are two buttons: "Login" (light blue) and "Sign Up" (white). The "Login" button is selected. Below the buttons, there are two input fields: "Email Address \*" and "Password \*". The "Email Address" field contains the text "sanjeevigopal60@gmail.com". The "Password" field contains three dots "..." and a "Show" button. Below the input fields, there is a large blue "Login" button.

# CONCLUSION

- **Enhanced Communication:** The tool offers features like **one-to-one chat**, **group chat**, **user search**, **profile viewing**, and **real-time notifications** to streamline user interactions.
- **Simplified User Experience:** Makes it easier for users to stay connected, manage conversations, and find others efficiently.
- **Scalable Platform:** Ensures adaptability to meet evolving communication needs.
- **Focus on Security:** Provides a secure communication environment for users.
- **Seamless Experience:** Prioritizes smooth user experience, making it suitable for both personal and professional use
